

Section: Edge of grassed area and asphalt paving

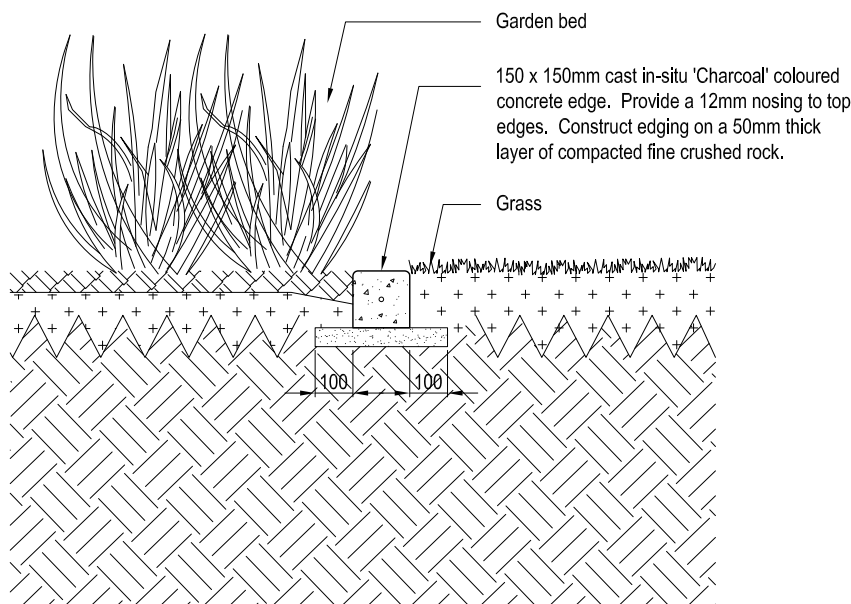

Cast in-situ concrete edges may be used as an edge treatment along asphalt paths and shrub beds and as a mowing strip within selected locations within parks and gardens.

Concrete to be 'Charcoal' coloured, achieved by adding 15kg/m³ black oxide 'Bayer 318', or approved equal, to concrete mix prior to pouring.

For typical construction details, refer to City of Melbourne, Engineering Standard Drawings:

Asphalt pathways in parks
