

The wall-mounted light is to be used in small streets and laneways within the Central City and Docklands. The light is available in two sizes to accommodate the lights overhang requirements.

The light is generally mounted at 5 metres and 5.5 metres above pavements.

Lights are to be set out evenly along the street at approximately 12 metre centres. The placement of lights should be carried out in consultation with a specialist lighting engineer to ensure the relevant lighting standards are met.

The lights have a plasma luminaire. Wattage to be determined by a specialist lighting engineer. The support arm and wall brackets are to be fabricated from stainless steel.

For fabrication & installation drawings, refer to City of Melbourne, City Design drawings; Project No: 95158 - Wall Mounted Lights
