

Section

The 'Neighbourhood light' is to be used within selected secondary streets within the Central City and Docklands.

Lights are to be spaced evenly along the street at approximately 15 metre centres. The placement of lights should be carried out in consultation with a specialist lighting engineer to ensure the relevant lighting standards are met.

Light poles must not obstruct pedestrian paths of travel or passengers exiting from on-street parked vehicles.

The lights have a metal halide luminaire. Wattage to be determined by a specialist lighting engineer. All street lights within the Central City and Docklands are fabricated from aluminium and then powder coated Dulux 'Silver Glow Pearl' 84623.

For fabrication & installation drawings, refer to City of Melbourne, City Design drawings; Project No: 901603
