

Section

The removable timber bollard is used within parks & gardens throughout the municipality.

The fixed timber bollard is used to prevent vehicle access from park perimeters, around car parking areas, and from along park pathways.

Post material is to be Iron Bark or White Cypress Pine (Class A) dressed all round (DAR) 150mm square section. The ground socket and lid are to be fabricated from mild steel & galvanised.

For fabrication & installation drawings, refer to City of Melbourne, City Design drawings; Project No: 5042-F01-Removable Wooden Bollard
